Goals for this session:
1. Locate relevant articles in a journal database.
2. Learn how to find a source mentioned in a newspaper article and a bibliography.
3. Determine if a journal is owned by the Libraries and if so, is it in print or online or both.
4. Know how to connect to UW Restricted resources from off-campus.
5. How to know a Web site.
6. How to avoid plagiarism.

1. Finding articles in a journal database:
   - Two kinds of databases:
     a. ProQuest Research Databases, and Expanded Academic Index
   - Citation only: Arctic & Antarctic Regions Web of Science
   - Academic & Antarctic Regions demonstration.

General interest science journals and magazines. Also, browse the Natural Science Library Periodical Display Area (Allen Library South First Floor).
1. Ambio
2. BioScience
3. Discover
4. Endeavour
5. Focus
6. Oceangraphy (Washington, D.C.)
7. Proceedings of the National Academy of Sciences of the United States of America
8. Science
9. Science News
10. Scientific American

Polar journals:
1. Arctic
2. International Journal of Circumpolar Health
3. Polar Record
4. Polar Research
5. Arctic Climate Impact Assessment

Newspapers:
1. New York Times Science Times, every Tuesday
2. ProQuest Newspapers are under Research Databases.

General interest Web sites:
2. Finding articles (or books) cited in a newspaper article and a bibliography:
See examples:
   - Investigating local definitions of sustainability in the Arctic: insights from post-Soviet Sakha villages:
   - The new face of the Arctic: Nature
   - Polar Record, 37:315-328
   - The Arctic - Environment, People, Policy

3. Determining if the Libraries has a journal, in print or online:
Using the UW Libraries Catalog
   - The Catalog is available to anyone, no restrictions on access.
   - Use the Catalog to find books and journals.
   - Use a journal database to find articles in journals.
   - Note that the Catalog doesn't know the contents (article titles) of the journals, only the journal titles.
   - Click on Journal searches to change to the Journals only subset. Select a Title search, and type in the title of the journal.
   - A journal record includes information about the print copy or copies in the Libraries, plus a link to the online subscription (when available...many are)

4. Connecting to the Libraries resources from off-campus:
   - A UW Restricted Resource is limited to use by current students, faculty and staff.
   - Use the Off-Campus Access link found on most of the Libraries main Web site and on many other Libraries Web pages.
   - Login using your UWNetID and password.
   - Permits access to all databases and journals that the Libraries subscribes to.

5. How to know a Web site:
   - http://www.lib.washington.edu/travels/research01/index.html
   - http://www.lib.berkeley.edu/Teaching_LibGuides/Internet/Evaluate.html

6. How to avoid plagiarism:
   - http://www.lib.washington.edu/research/wri.html Citation guides.
   - What is a citation? Citations provide the bibliographic information that allows your readers to find the publication you are using. When you use a direct quote, a paraphrase, or structure of an argument, cite your source.
   - Use RefWorks subscription software to help you keep track of and use your citations. Connect to RefWorks from the Libraries Catalog—search by Title

---
